ROCKFORD, ILL., U.S.A.

To Our Friends, Greeting.

Friends and Patrons: A Happy New Year to you all! Again at the dawn of a New Year we send greeting to our friends and patrons, together with our New Enlarged Seed Book for 1908 of New and Reliable Seeds. We thank you all for very liberal orders given us in the past.

We greatly appreciate and want your orders. Plant Alneer's Reliable Seeds to be assured of large and bountiful crops. We have the finest and most select stock of seeds in the world, and sell them at prices that are right; no better seeds can be had at any price. We ask you to compare prices with others you may get, and by doing so you will find it to your advantage to buy from us; we save you money. Our motto is: **Best Seeds Only.** Planters should consider this before placing their orders for seeds, for "such as ye sow, such shall ye reap." Send us your orders as early as possible.

Thanking our friends and patrons for their kindness and liberal orders in the past, we solicit a continuance of the same. Send in your orders as early as possible, and induce your neighbors and friends to join their orders with yours, and all send for Alneer's Reliable High Grade Tested Seeds.

Yours very truly,
ALNEER BROTHERS.

Club Orders. On a Club Order amounting to \$3.00 in packets, 15 per cent. cash discount. On a Club Order amounting to \$5 in packets, 20 per cent. cash discount. On a Club Order amounting to \$10 in packets, 30 per cent. cash discount.

Positively, these offers are for seeds in packets only. Seeds by weight or measure, plants, bulbs or implements *cannot* be included in these club rates. With our low prices this makes the greatest offer in seeds ever made. Any one can, in a few hours among neighbors, make up a club.

Seeds Given Away, or Extras. Every year we *distribute* free to our customers large quantities of seed packets of choice and rare sorts. The larger the order the greater will be the number of extras thrown in as a rule, exceptions being made only when heavy bulk seeds are ordered, such as farm seeds.

Our Packets. We guarantee that our packets are large size and well filled with choice, fresh seeds. Our customers say that our packets are larger and better filled than most seedsmen's packets. We have no half size packets.

What We Warrant. We believe that the seeds we offer are excelled by none in the world, yet our practical experience of many years fully assures us of the fact that crops may fail no matter how fresh and pure the seeds sown to produce them may be. Therefore, while we exercise the greatest care to have all seeds pure and reliable, it is hereby mutually agreed between ourselves and the purchaser that we are not in any respect liable or responsible for the seed sold by us, or for any loss or damage arising from any failure thereof in any respect, further than that should they not prove as represented, we will refill the order without charge.

Our Prices have been placed as low as possible for first *quality and honest seeds*, besides the many *Extras* we shall continue to *freely throw in*.

Seeds, Bulbs and Plants Free by Mail. All seeds, bulbs and plants are sent free by mail or express at prices quoted, to any part of the United States, unless otherwise specified, except seeds by the $\frac{1}{8}$ bushel, $\frac{1}{4}$ bushel, $\frac{1}{2}$ bushel and bushel, which are sent by express or freight at buyer's expense. In such instances we reserve the privilege of enclosing in the bags or packages such small packets as may be ordered, as it does not increase the transportation charges, and, in consideration of this, we will add enough extras to fully repay our customers for this kindness. Our Canadian customers will please add at the rate of 8c per pound for postage, as it costs 16c per pound to send seeds from the U. S. to Canada.

How to Send Money: *The money must accompany the order*, and can be sent safely by Postoffice Money Order, by Draft on New York or Chicago, by Registered Letter or by Express Company's Money Order. Please do not send individual checks, as it costs 25c to return to your bank to be cashed. We disclaim all responsibility when remittances are not made as above directed. Very small amounts may be sent in postage stamps.

Name and Address. Please remember to write your *Name, Postoffice, County and State* as distinctly as possible, especially the name, also the nearest Express Office. We can ship by American, Adams and United States Express, as desired.

New International. The New International is a watermelon of medium to large size and of high table quality. It is of Southern origin, but thrives well in the North, even on soils which are quite heavy, provided they are well enriched. In shape it is oblong. The outside color is pale, with dark markings, resembling Seminole, but with markings more distinct. The flesh is brilliant red in color, and remarkably solid; so solid, in fact, that a 40-pound New International watermelon does not appear to be much larger than a Seminole weighing only 25 pounds. It is particularly firm and solid at the heart. The flavor is delicious, and the flesh is entirely stringless. The rind, though thin, is very tough, making an effective protection to the flesh, and insuring good shipping qualities. It is almost unrivalled in all respects, for both home and market; and in many places not well adapted. The reason that this fine, new watermelon received the name of International, was because of its proven ability to flourish almost anywhere, even in districts where watermelons are not usually grown. Its adaptability to location is possessed by very few melons. Pkt. 5c; oz. 8c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

Speltz is also a hay. It will yield from 40 to 60 bushels of grain to the acre, equal to corn or barley, oats, rye or wheat, of high feeding value, and tons of straw hay almost equal to timothy for feeding cattle. Japanese Millet. Or "Billion Dollar Grass," as it is sometimes called, is of recent introduction, and great claims are made for it as to productiveness and value as a forage plant. Its introducers say of it that it is a marvelous grower and luxuriant stooler, and Prof. Brooks, of the Massachusetts Experiment Station is quoted as saying: "At our station it produced 60 bushels of seed, 11,297 pounds of straw, 36,000 pounds of green fodder, 12,000 pounds of hay per acre, being superior to good corn fodder in feeding for milk, and in combination with the soja bean makes a very superior ensilage. Recommended highly for feeding dairy cattle, young stock and sheep, being very rich in nutritious elements. If sown latter part of April will be ready to cut for hay by middle of July. Six tons per acre of green forage have been harvested in one cut in poor silicious soils with second cut for seed of August alone or with a cereal, rye preferred, as this Vetch reaches a

height of 3 $\frac{1}{2}$ to 5 feet, and must have a support. Sow 60 to 75 pounds per acre. If good growth before winter, it may be cut, and again by March 15. Eaten by all farm stock. Lb. 30c, at buyers expense; 10 lbs. \$1.00; 25 lbs. \$2.30; 50 lbs. \$4.50; 100 lbs. \$8.50.

BROMUS INERMIS

Most Valuable New Grass Introduced in the Last Twenty-five Years.

Bromus adapts itself to nearly all conditions of soil and climate and yields enormous quantities of hay and makes abundant pasture. Defies drought and is not affected by frost. A decided success. It forms a very thick dense sod and is a permanent grass not killed out by variations of weather. Easily destroyed when desired by plowing, however. Universally recommended by the Experiment Stations of the northwestern states and by the U. S. Dept. of Agriculture. Prof. Shepard, of North Dakota Agricultural College, says: "The eagerness with which it is sought by stock leads me to believe that it is of as much value as timothy for pasturage, and that the hay is as valuable, ton for ton." Sow early in the spring, 20 pounds per acre alone or 15 pounds if sown with alfalfa. Price, postpaid, lb. 25c at buyer's expense; 10 lbs. \$1.25; 25 lbs. \$3.25; 50 lbs. \$6.00; 100 lbs. \$11.00.

Teosinte. Recommended as the most prolific forage plant yet introduced. The stalk, containing much saccharine matter, is very nutritious. It can be cut several times during the season, yielding enormously. One seed will sometimes produce 20 to 60 stalks or shoots, and the warmer the climate the better it yields. Should not be planted until the soil is perfectly warm in the spring. Requires about 4 pounds seed per acre. Plant in drills 3 feet apart, and 2 or 3 seeds every 12 inches in drill. Oz 10, $\frac{1}{4}$ lb 25c, lb 75c.
